**A | F | P**

Through process of research and experimentation, carefully chosen materials and crafted details are used to help create unique and beautiful spaces. AFP's work ranges in scale, from the design of a bespoke door handle and the interior spaces through to large scale building. AFP collaborate closely with clients, consultants, contractors and makers in the pursuit of creating finely crafted spaces that enhance the experience of the end users.

---

We indulge in simple but unique design solutions that delight and invite. This is achieved by balancing strategic insight with conceptual thinking, creative intuition and experience. A preoccupation with colour and material embodies our work and is often the starting point of any project. Our factory enables us to experiment freely with paints and finishes, models and prototypes and this is fundamental to how we design.

---

We form true partnership with our clients, suppliers and internally, across our design disciplines. It means our clients are involved in every step of the way towards achieving a shared vision.

---

Our level of involvement in a project is top notch as we work according to our clients' needs. We enjoy the opportunity to work from concept to completion. However, we are also happy to assist with specific stages of a job. We also understand that collaboration results in better designs so we work closely with our clients.

---

We indulge in the collaboration of intuition, judgement, and creativity to birth innovation. We believe that this is just as important as logic, craftsmanship and attention to detail.
